

LEIGHTON O'BRIEN

Those who want the **cleanest fuel, cleanest tanks** and smooth changeover to **Biofuels** need to know Leighton O'Brien.

Leighton O'Brien's Fuel Restoration and Biofuels solution was formed to meet today's industrial and business needs in conversion, maintenance and conditioning of critical fuel and tank systems.

Leighton O'Brien offers the most comprehensive solutions for fuel product quality management issues via 3 services: **Fuel Restoration**, the restoration of dirty, degraded and aged fuel back to optimal condition; **Biofuel Tank Conversions**, a comprehensive service to manage and implement a tank changeover to Ethanol and Biodiesel; **Tank Cleaning**, the removal of foreign material from a tank wall and fuel down to 2µm particle size.

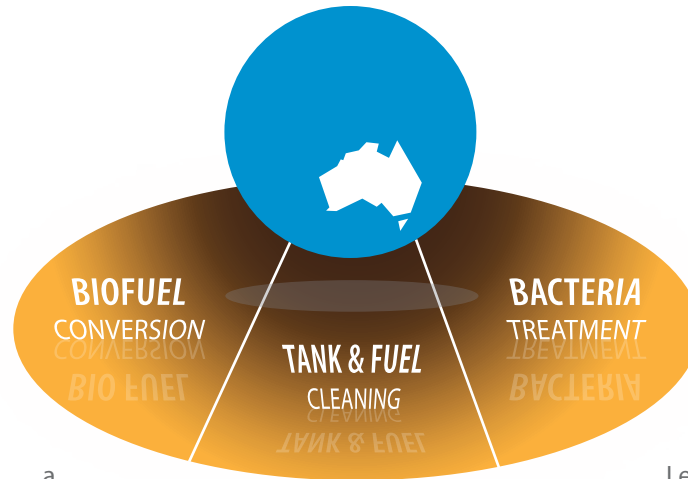

Leighton O'Brien delivers:

- The most comprehensive solution for managing fuel quality issues
- Restoration of dirty, degraded and aged fuel back to optimal condition
- A comprehensive service to manage and implement a tank changeover to Biofuels
- The removal of foreign material from both the floor and walls of the tank
- Stops microbial activity from thriving

Leighton O'Brien provides Optimal Fuel Quality at All Times

Integrated Fuel Restoration Solution.

Biofuel Conversion

Leighton O'Brien provides a comprehensive service to prepare, convert and maintain underground storage tanks for Biofuels.

Fuel and Tank Cleaning

Leighton O'Brien provides a total process that removes debris, filters particulates from fuels and tank walls - polishing fuels to optimum quality.

Bacteria Treatment

Leighton O'Brien's unique system stops microbial activity and removes the environment for microbial life.

The traditional treatment for fuel problems is Biocide, but the facts clearly demonstrate that Biocide is an ineffective and inappropriate treatment to maintain fuel quality. It simply does not solve the primary issues with fuel quality. In addition it is toxic to humans and Leighton O'Brien's recommendation is at no time should Biocide be used in a storage tank system.

Leighton O'Brien's fuel restoration services is a comprehensive and thorough solution to all fuel quality issues that uses the best available technology:

Fuel Treatment Solutions	Biocide	Traditional Tank Cleaning	Leighton O'Brien
Removal of water	✘	✓	✓
Stop microbial activity	✓	✘	✓
Restores fuel quality	✘	✘	✓
Conduct fuel quality tests	✘	✘	✓
Clean tank floor and walls	✘	✘	✓
Removes sludge & sediment	✘	✓	✓
Treats polymerized fuel	✘	✘	✓
