Mr. Brevard,

Since the Dri-Sum Containment Tightness Testing method has been evaluated and listed by the National Work Group On Leak Detection Evaluations (NWGLDE), Illinois will accept this method for testing secondary and spill containment systems.

Please note, all persons conducting testing of UST equipment in Illinois must be certified by the manufacturer of the testing equipment being used and certified in the appropriate module and licensed by OSFM.

Please let me know if you have any questions.

Sincerely,

Jim Bentley

James R. Bentley
