David,

You have the State of Colorado's approval to use the Dri-sump Containment Tightness Test method to perform integrity testing of secondary containment sumps and spill buckets including STP, Transitional, UDC or spill buckets.

We would like to be present for a field demonstration in the very near future. Please let me know when that can be arranged.

Thank you for reaching out to us. If you have any other questions or concerns, don't hesitate to ask.
