I am on NWGLDE, so I'm quite familiar with the listing. Let me know if your product is being installed/used in NJ and I'll stop in to check it out.

Subject: [EXTERNAL] Re: Acceptance of NWGLDE listing for Dri-sump™ Containment Tightness Test Method

Hi Mike,

I will be in Maine this week to train contractors for the state of Maine but if you have had time to review the [NWGLDE published Dri-sump Containment Tightness Test method](#), please let me know. We have seen tankowners and contractors that would really like to use this method instead of the costly hydrostatic method in New Jersey. Please let me know if you need more information or if you can provide acceptance. Thank you for your time!

Sincerely,

Danny Brevard; PG

We don't have any kind of separate listing or review program in our state for equipment or testing methods. If it has a 3<sup>rd</sup> party listing, it's allowed.
