Mr. Brevard,

With the NWGLDE listing, Iowa will accept this as a method for testing secondary containment systems.

To reiterate, the person & company conducting testing of UST equipment in Iowa, must have a current Iowa tester license, which also requires manufacturer certification. Other licensing requirements may be found here: <https://www.iowadnr.gov/Environmental-Protection/Land-Quality/Underground-Storage-Tanks/Licensed-UST-Professionals>

Let me know if you have additional questions.

Elaine Douskey
