RE: Request for State Review for the Dri-sump Containment Tightness Testing Method.

Dear Mr. Brevard,

After your submitted request to review the Dri-sump Containment Tightness Testing method on February 21, 2019. Kansas Department of Health and Environment (KDHE) Storage Tank technical staff has reviewed Ken Wilcox Associate's EPA 3rd party testing evaluations, the NWGLDE evaluations, and the additional documentation that you and your associates provided for the state review. The KDHE technical staff was able to recommend that I approve the method for use in the State of Kansas. I am happy to report that with this recommendation KDHE will approve the Dri-sump Containment Tightness Testing method for use in the State of Kansas. Thank you for your time and attention to this process.

Sincerely,

A handwritten signature in black ink that reads "Marcus A. Meerian". The signature is fluid and cursive.

Marcus A. Meerian
