Mr. Brevard,

The Department has reviewed your equipment registration for the Dri-sump Containment Tightness Test. Your new EQ number is EQ-915 and I have attached your completed EQ file (essentially you did a great job of submitting everything together in a PDF). It has also been posted on our [Storage Tank System Equipment Registration](#) webpage awaiting publishing (should be by the end of the day or tomorrow).

It will be categorized as Miscellaneous under "I. Hydrostatic and Containment Testing".

Please let me know if you have any questions.

Thanks, Kim

Kim Curran
