Danny and David Brevard

Missouri Department of Natural Resources, Tanks Section has approved the Dri-sump Containment Tightness Test Method submitted by AC'CENT Environmental. Individuals using the Dri-sump Containment Tightness Test Method in Missouri must attend the required AC'CENT Environmental training and follow directions provided by AC'CENT Environmental. In addition, individuals must follow the NWGLDE evaluation for the Dri-sump Containment Tightness Test Method.

If you would have training in Missouri, we would be interested in attending a class.

If you have any questions, please let me know.

Darryl Slade

Environmental Scientist

Missouri Department of Natural Resources

UST Compliance and Technology Unit

(573) 751-7877

We'd like your feedback on the service you received from the Missouri Department of Natural Resources. Please consider taking a few minutes to complete the department's Customer Satisfaction Survey at <https://www.surveymonkey.com/r/MoDNRsurvey>. Thank you.
