

LEIGHTON O'BRIEN

ATG ALARM MANAGEMENT SOLUTION

FUEL VISIBILITY, SMART ALARMS, COMPLIANCE MONITORING

As a commercial or industrial operator with onsite fuel systems to keep your fleet on the road or critical infrastructure running, the ability to monitor inventory and water levels, alarms and compliance status in real-time is key to reducing your operational risk. Fuel stock outs, product contamination, theft and leaks can impact fleet and equipment uptime and severely disrupt – or shut down – your site at huge expense. Leighton O'Brien's alarm management solution (AMS) leverages your ATG investment with remote, live 24/7 monitoring of your inventory data and ATG alarms via a web portal. Featuring intelligent alarm workflows, our software can poll, prioritise, and manage 80% of alarms remotely and direct attention to critical issues that could threaten your operations.

Live ATG alarm monitoring

- Remote visibility into fuel inventory & ATG alarms 24/7
- Monitoring & reporting of fuel & water levels, temperature, deliveries & alarms

Reduce runouts

- Low or high fuel levels alarms to prevent stock outs & stock fulls
- Avoid critical equipment outages & fleet downtime

Smart alarms

- Proprietary algorithms to remove false alarms & escalate real alarms
- Reduce unnecessary maintenance dispatches to site & better target maintenance spend

Theft prevention

- Fuel/sudden loss alarms & delivery receipts to identify pilferage
- Remote tank monitoring of unattended sites where fuel theft is higher

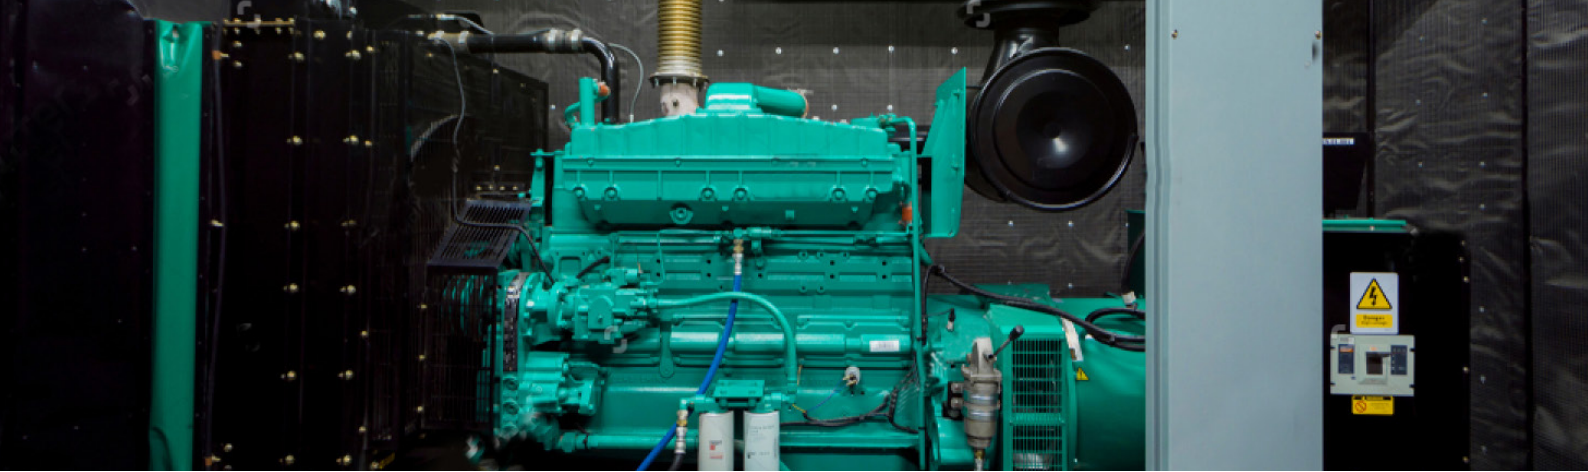

Critical equipment uptime

- Smart water alarms to prevent product contamination, equipment damage and fleet maintenance costs

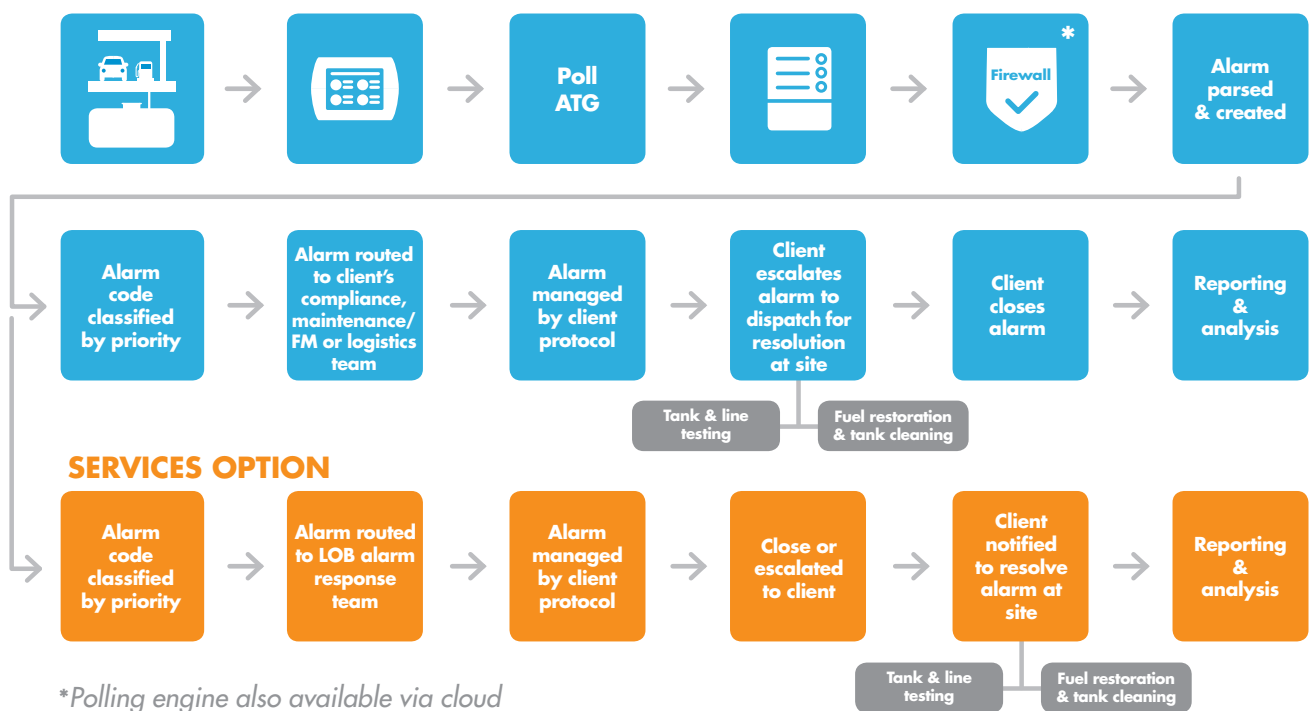

Compliance reporting

- Retrieve, store, and report environmental compliance results
- Reduce environmental risk from no delayed or missed real alarms for early leak detection

ALARM RESPONSE WORKFLOW

THE LEIGHTON O'BRIEN ADVANTAGE

- **Smart alarm innovation:** Our proprietary algorithms apply logic over the data combined with workflows to remotely resolve 80% of alarms.
- **Intuitive software:** 24/7 access anywhere to your ATG data and alarms via secure web-based portal featuring an intuitive user interface.
- **Hardware compatibility:** Our ATG polling and alarm response solution can be implemented regardless of ATG brand or type.
- **Holistic solutions:** We have 25 years' experience providing onsite leak detection and fuel system intelligence to enhance our remote fuel data analytics to reduce environmental risk & cost.
